

QUICK START GUIDE - AERO N100

Connect to the Room System

To show BYOD content on the display(s):
Connect the provided HDMI cable to your device

To access the room's camera and microphone for video conferencing:
Connect the provided USB-A cable to your device

To access the room's speakers to play audio:
Select **Crestron** as the system audio output on your device

- Audio will play from the last selected source, indicated by the highlighted music note
- Select Via Connect Pro to connect your device wirelessly
- Shows the current state of the in-room display
- Press to change the state
- Volume control for all microphones

- Push to turn the system off
- Select WP-1 to display the in-room PC
- When a device is connected to the provided HDMI cable, WP-2 will automatically be selected on the touch panel
- Volume control for the selected source

The WP-2 source selection will display the document camera unless a device is connected to the BYOD HDMI cable. Press 1 for BYOD or 4 for the Document Camera on the device shown below in order to switch back and forth while a device is connected.

This device is located under the lectern on the left side, near the lectern height adjustment buttons.

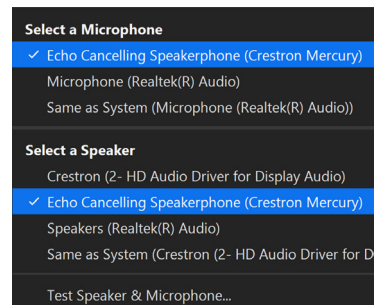

Video Conference

Zoom Video Input Selection:

Select **Huddly IQ** as the camera option within the Zoom meeting.

Zoom Audio Input/Output Selection:

Select **Echo Cancelling Speakerphone** as the microphone and speaker option within the Zoom meeting.
