

AV Quick Start Guide

Connect to the Room System

To show content on the display(s):

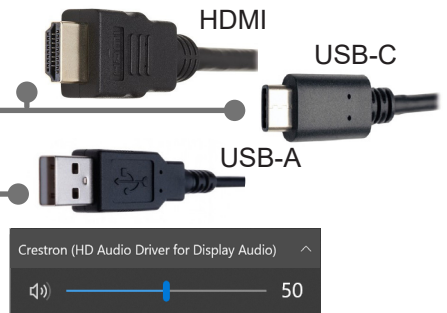

Connect the provided HDMI cable or USB-C cable to your device.

To access the room's camera and microphone for video conferencing:

Connect the provided USB-A cable to your device.

To access the room's speakers to play audio:

Select **Crestron** as the system audio output on your device.

The camera tab allows you to preview and control cameras manually

The mics tab allows you to adjust individual volume and mute/unmute mics

The utilities tab allows access to:

- Display power
- Screen control
- Show video
- HDCP control

To show laptop content on display:

1. Connect the laptop using the supplied cables
2. Select the laptop connection type from the list provided

Shows the current state of display

Mute/unmute microphone

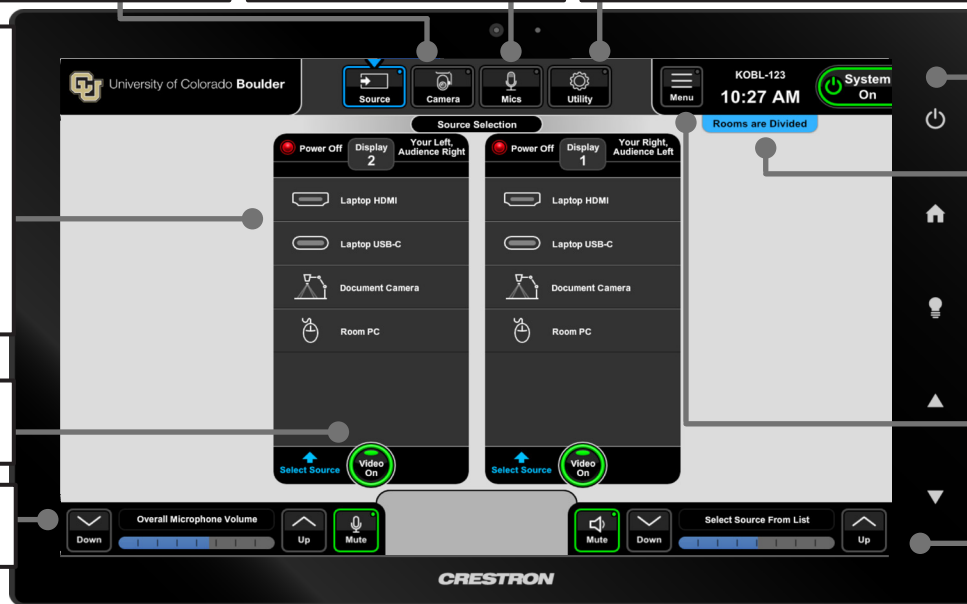

Push to turn the system off

Room setup status

When in "combined" mode, a source can be selected on either touch panel and will appear on both displays in the room

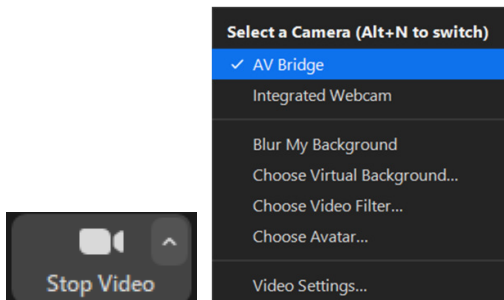

The menu tab allows you to navigate to different pages of the touch panel

Volume control for the selected source
