CU Boulder Quick Start Guide for Windows

Before you begin...

Get ready for setup: This self-service setup process is designed for individuals to complete by themselves. Ensure you are comfortable proceeding by **reviewing the step-by-step setup process: https://buff.link/scwin**
Don't hesitate to request help if needed from resources listed below.

Scan code to view setup instructions

Use a second device to reference setup instructions. You can use a computer previously issued to you from CU or a personal computer, phone, or tablet.

Be patient. Computer setup may take up to **2-3 hours to complete**. You cannot move locations or close your laptop once you begin, as that may disrupt the automated setup process.

Ensure you have a stable internet connection before proceeding with the automated computer setup and application installation.

The setup process will configure OneDrive for cloud file storage. Before proceeding, please make sure the files you need are accessible in OneDrive so that they will be available on your new computer.
Visit **https://onedrive.live.com/login** to see the files that are in your OneDrive. If you don't see your files there, you might need to move them from your old computer to OneDrive. If you need help with this, reach out to your IT support.

Need Assistance?

- **DDS-supported users:** Schedule an appointment with a technician through the DDS Service Request Portal at **https://desktopsupport.colorado.edu**
- **IT Professional-supported users:** Schedule an appointment with them.
- **Unsure of support?** Contact the IT Service Center at 303-735-4357 or **oithelp@colorado.edu** for more information, or to schedule an appointment with Buff Techs, visit **https://buff.link/bufftechs**
