

SensusAccess Accessibility Policy

September 2015

Sensus is committed to provide solutions in full compliance with the generally accepted principles of accessible design. This commitment embraces all systems and deliverables from Sensus, including desktop applications, web services, smartphone apps and documentation in digital format.

The SensusAccess service has been developed in accordance with the international guidelines for accessible webdesign, ISO/W3C Web Content Accessibility Guidelines 2.0 Level AA.

SensusAccess can be accessed and used by users with or without special needs, including users with assistive technology.

In the unlikely event of encountering accessibility issues, please write to contact@sensus.dk with details of the issue and a description of how the issue may be reproduced. Sensus will take immediate action and rectify any breaches in relation to the accessibility guidelines.
